

OUT THE GATE IN 48

Your Day Zero X39 Toolkit. Know what to say, what to send, and where to point people, starting today.

[] STEP 1 — Sign Up to the Emails

Go to dreamteam.community/home. Click the top blue button "Sign Up to Dream Team Emails" and complete the form. This gets you the weekly itinerary, sent every Sunday night, plus access to trainings.

[] STEP 2 — Know What X39 Is

Watch: [What is X39?](#)

Watch: [What is Photo Therapy?](#)

Two short videos. Enough to speak with confidence.

[] STEP 3 — Know What to Say

Standard opener:

"Hey, you seem like someone who looks after yourself. Quick one, have you heard of a wearable light therapy patch? It's drug-free, backed by clinical studies, and it's made a genuine difference for me personally. Want me to send you a quick video so you can see exactly what it is?"

Netflix / first mover opener:

"I've found something I'm genuinely excited about. It's about to get major exposure with a Netflix feature, and we're positioned as first movers here in Australia, New Zealand, and South Africa. It's backed by over 200 patents, operates in more than 100 countries, and did close to a billion dollars in turnover by the end of 2025. It's made a real difference for me personally, and there's a business opportunity attached to it too. Want me to send you two short videos?"

Goal of the opener is one thing only: get them to say yes to watching two short videos, under six minutes total.

[] STEP 4 — The Scripts

Face to face:

"Hey, you seem like someone who looks after yourself. Quick one, have you heard of a wearable light therapy patch? It's drug-free, backed by clinical studies, and it's made a genuine difference for me personally. Want me to send you a quick video so you can see exactly what it is?"

Phone (people you already know, not cold strangers):

"Hey [Name]! (whatever's genuinely going on with them, skip generic small talk) Random question, you got a sec? Have you heard of light therapy patches before?"

(Let them answer)

"Yeah, I started using one a few weeks back, wasn't sure what to expect, but it's actually made a real difference for me. Want me to send you two short videos, under six minutes total, so you can see exactly what it is? No pressure either way."

Text / WhatsApp:

“Hey [Name], I’ve been using this simple wearable patch and it’s made a real difference for me. It’s drug-free and backed by clinical studies. Mind if I send you two short videos so you can see exactly what it is?”

Email:

Subject: “Something I wanted to share with you”

Hi [Name], Hope you’re doing well. I wanted to share something I’ve been using personally, it’s a wearable light therapy patch called X39, drug-free and backed by clinical studies. It’s made a genuine difference for me, and I thought of you because [personal reason]. Here are two short videos if you’d like to see exactly what it is: [video links]. Let me know what you think.

[Name], Independent LifeWave Brand Partner

[] STEP 5 — What to Send People Who Are Interested

[LifeWave X39 \(1:45\)](#)

[NZ & Aus Testimonials \(4:08\)](#)

[Sarah's Personal Testimony \(2:09\)](#)

If you know Rudolf, you already know Sarah. If you’ve seen Stories of Light, been on any of the trainings, or watched her testimonial video, you can use her story as your own credibility until you’ve built your own: “Hey, you know Sarah? This is what she’s gone through...”

[] STEP 6 — Where to Send the “Investigator” Types

For people who are more academic or technical and want to dive deeper into the patents and clinical studies, send them to thisisitinfo.com.

[] STEP 7 — Carry a Sleeve

Keep it in your bag, not on your body. Avoid body heat.

[] STEP 8 — When Someone's Interested

Connect them directly with the person who sponsored you, or Rudolf, especially if you’re new and still learning. You’ll already have your weekly itinerary from Step 1, showing the live Zoom schedule. Best results always come from getting people onto a live Zoom call.

HOWEVER, IF YOU FEEL YOU’RE ABOUT TO LOSE THAT PERSON, send them the pre-recorded Business Opportunity recording instead: [watch here](#)
